Profile

I am a passionate IT student at Murang'a University of Technology, deeply interested in data analytics, software development, and AI-powered solutions. I'm currently pursuing a Data Analytics certificate with ALX Africa, where I've gained strong skills in Python, SQL, Tableau, and web technologies. My goal is to use data and technology to solve real-world problems, especially in sectors like agriculture, sustainability, and technology.

Education

Murang'a University of Technology – Murang'a, Kenya

Bachelor of Science in Information Technology

Sep 2022 – Expected Sep 2026

Key areas: Data Science & Analytics, Programming, UI/UX Design, Networking, and Database Management.

ALX Africa – Remote

Data Analytics Certificate

In Progress – Expected Completion: 2025

Learning focus: SQL, Python (Pandas, NumPy), Tableau, and Data Visualization.

Moi Barracks High School – Eldoret, Kenya

Kenya Certificate of Secondary Education (K.C.S.E) 2017 – 2020

Attachment

ICT Authority – Nairobi, Kenya

Software Engineer May 2025 – Present

Supporting the team in developing and debugging websites and managing databases to improve the efficiency of ICT systems.

Achievements

- Earned certifications in CISCO Windows and Linux Operating Systems
 - Completed CISCO Network Basics certification
 - Served as a class representative for 3 years, building leadership and communication skills
-

Projects

1. Online Voting System

Developer, Murang'a University Project (Jan 2024 – May 2024)

I created a secure online voting system using HTML, CSS, JavaScript, PHP, and SQL. The platform enabled real-time vote tallying, improved transparency, and eliminated manual errors. During a mock election, it successfully handled over 300 user votes without any data breaches.

2. House Price Prediction Model

Data Analyst, Personal Project (Jun 2024 – Aug 2024)

I built a machine learning model using Python (Pandas, Scikit-learn) to predict house prices based on location and other features. The model achieved a 90% accuracy rate using a dataset of over 10,000 records. I presented the insights to stakeholders, highlighting areas for potential investment.

3.Sales Insight Dashboard (Power BI)

Data Analyst, Personal Project (Nov 2024 – Jan 2025)

I developed a Power BI dashboard to analyze sales performance across products, regions, and time. The dashboard helped users quickly identify top products, trends, and outliers, cutting down manual reporting time by 50%.

Professional Foundation Skills (from ALX Africa)

Through ALX, I've developed strong soft skills that support my technical abilities:

- Clear and professional communication
 - Critical thinking and structured problem-solving
 - Teamwork and agile collaboration using tools like Slack and Trello
 - Managing time and meeting tight deadlines in remote environments
 - Professionalism, personal branding, and ethical responsibility
 - Flexibility and the ability to adapt to new challenges quickly
-

Technical Skills

- Programming & Data Analytics: Python, SQL, JavaScript, PHP
- Data Visualization: Tableau, Power BI
- Web Development: HTML, CSS, React.js, Tailwind CSS, Laravel

- Database Management: MySQL
 - Networking: Cisco switch and router configuration
 - Operating Systems: Windows and Linux
 - Office Tools: Microsoft Word, Excel, PowerPoint
-

Hobbies & Interests

- Exploring AI in Agriculture and Healthcare
- Developing Data Science and Machine Learning Models
- Web and Mobile App Development
